[PyroTechTraders](#)

### LANGUAGES

Tamil 

English 

### OBJECTIVE

With over 12 years of experience, I've managed 25+ web design and development projects, creating robust, scalable applications across various industries. I'm a quick learner, team player, and strong leader, able to work independently when needed.

### WORK EXPERIENCE

#### OPTTECH COMPUTING INC, US

Software Engineer

Jul 2014 - Oct 2019

WI worked on software for a Granite Monuments manufacturing company, which functions as an ERP solution for complete business automation. The application allows admins to create custom products and define any manufacturing process within the system.

Tools : C# .NET, MVC, SQL, Entity Framework, Bootstrap, Kendo UI, Telerik, jQuery, Ajax, TFS, AWS.

Analyzed requirements and designed the UI using Bootstrap. I contributed to the development of the entire tech stack from scratch. Key features included custom product creation, role-based authentication, validation handling, product image processing, and email functionality. Additionally, I implemented product's barcode processing across the application and developed an app for the same to facilitate easy manufacturing updates at all workstations.

#### DJ Software Consultancy Private Ltd, Erode

Successfully completed 25 projects, demonstrating strong project management skills, technical expertise, and the ability to meet client needs in a fast-paced environment.

General Manager

Jan 2011-April 2012

As General Manager, I oversaw daily operations, project planning, and recruitment. I ensured employee productivity and development, prepared reports for upper management, and managed client interactions to guide the development team and implementation plans.

Project Manager

Jun 2009 - Dec 2010

As Project Manager, I oversaw project planning, execution, and completion. I managed team tasks, timelines, and budgets, ensured clear communication with stakeholders, addressed risks, and ensured project goals were met efficiently.

Software Engineer

May 2008 - May 2009

Projects (Few)

Tools: Php, MySQL, HTML, CSS, JavaScript, jQuery, Ajax, SVN, Apache

- Multilevel Marketing
- Matrimonial Application
